ANKIT SAXENA

Data Engineer | PySpark · Databricks · Delta Lake · AWS · GenAI Data Platforms

Pune, India | +91 7500335301 | ankit282k@gmail.com | linkedin.com/in/ankit282k | github.com/ankit282k

PROFESSIONAL SUMMARY

Data Engineer with 2+ years of experience building production ETL/ELT pipelines and ML-ready data platforms on PySpark, Databricks, Delta Lake, and AWS. Processed 30M+ records daily, cut pipeline runtime by up to 45%, and shipped CI/CD-deployed data workflows supporting forecasting and GenAI use cases across retail, enterprise AI, and franchise management. AWS Certified Cloud Practitioner.

TECHNICAL SKILLS

Data Engineering: PySpark, Apache Spark, Databricks, Delta Lake, Snowflake (Snowpipe, Streams, Tasks), SQL, Hive, Medallion Architecture, Data Modeling (Star Schema, SCD), Incremental Ingestion, Schema Evolution, Partition Tuning

Cloud & DevOps: AWS (S3, IAM, EC2, CloudWatch, Redshift), Docker, GitHub Actions, CI/CD, Git, Linux

Orchestration & Backend: Airflow, Python, FastAPI, REST APIs

ML / GenAI: MLflow, Databricks AutoML, XGBoost, ARIMA, Feature Engineering, OpenAI SDK, HuggingFace, LLM Integration

PROFESSIONAL EXPERIENCE

AI/ML Engineer I | Simplifix Systems (Client: Vijay Sales) | Jan 2026 – Present

- Build and maintain Databricks pipelines in PySpark with AWS and MongoDB to process retail sales and inventory data for analytics and demand forecasting across stores and SKUs.
- Designed a centralized AWS data lake consolidating multi-source sales and inventory data, enabling governed, self-service analytics for multiple teams.
- Implemented 21-day item–store level time-series demand forecasting, improving product availability for inventory planning and replenishment.
- Used Databricks AutoML to automate model training and selection, reducing manual experimentation time.
- Built GenAI analytics assistants with the OpenAI SDK on top of internal data pipelines, enabling natural-language reporting.
- Own experiment tracking, model versioning, deployment, and monitoring with MLflow for forecasting models running in production.

Associate Software Developer | Bosch Global Software Technologies | Feb 2025 – Jan 2026

- Designed and optimized PySpark ETL pipelines on Databricks and Delta Lake for internal AI platforms, reducing processing latency by 28% and storage costs by 22%.

- Built production data workflows with distributed Spark jobs supporting ML and GenAI use cases.
- Developed LLM-powered microservices with FastAPI and HuggingFace on secure data pipelines, improving team productivity by 32%.
- Set up CI/CD with GitHub Actions and Docker to automate testing and deployment, reducing production issues.

Data Engineer Trainee | FranConnect Pvt. Ltd. | Sep 2024 – Feb 2025

- Built and maintained PySpark, Hive, and SQL ETL pipelines processing 30M+ records daily, improving performance by 45%.
- Implemented incremental ingestion, schema evolution, partition tuning, and caching, cutting Spark job runtime.
- Automated pipeline deployments with Docker and GitHub Actions, reducing integration failures.

Data Scientist Trainee | Dyno India Pvt. Ltd. | Feb 2023 – Aug 2023

- Built CNN and LSTM deep learning pipelines, improving validation metrics by 30%.
- Implemented recommender systems using Collaborative Filtering and FISM, improving recommendation precision by 25%.
- Delivered full ML workflows from EDA and feature engineering to deployment and documentation.

KEY PROJECTS

End-to-End Databricks ETL Pipeline | PySpark, Delta Lake, AWS S3, IAM

- Designed a Bronze → Silver → Gold Medallion architecture with incremental loads, data validation, and transformation jobs; improved runtime by 42%.
- Secured S3 storage with IAM-based access control. [GitHub link]

Snowflake Automated Data Warehouse | Snowpipe, Streams, Tasks

- Built automated Snowpipe ingestion from cloud storage and fact/dimension tables with SCD logic.
- Implemented Streams and Tasks for continuous incremental processing.

Time Series Forecasting with MLflow | XGBoost, ARIMA

- Developed forecasting pipelines with full experiment and model tracking in MLflow, achieving a 21% MAPE improvement. [GitHub link]

CERTIFICATIONS

- AWS Certified Cloud Practitioner (CLF-C02)

EDUCATION

B.Tech, Electronics & Communication Engineering | Chandigarh Engineering College | 2023 | CGPA: 7.93
